Afrikan Media Outlets

The follow is a list of media outlets and well known media practitioners (Journalist, Broadcasters, and Film Makers) from the Afrikan (Community), through which/whom we could channel our publicity and communications to the wider Afrikan public or which is a potential source for consultancy. We should attempt to engage every single one of them, although it should be noted that not all are necessarily progressive or committed to our people's cause. **NB.** This list is not exhaustive and is subject to expansion.
